Description

Brand new CFMOTO 450 MT 2026 model. In stock now. Some photos showing a range of genuine CFMOTO accessories available in 2026. The 450MT boasts rally-inspired styling with distinctive stacked headlights, making it not just an adventure machine but a visual statement. The modern ADV design ensures that you stand out on any terrain, combining function and form to provide an aggressive, eye-catching look that turns heads wherever you ride. The parallel twin-cylinder engine answers the call of the adventure enthusiast providing the ideal range of horsepower and torque, along with an exceptionally smooth power delivery. 31 kW at 8500 rpm and 42 Nm of torque at 6500 rpm is the muscle you need to tackle steep inclines and tough trails with ease. Thanks to the engine's 270º crankshaft angle, the low-end torque performs similar to a V-twin engine. Double counter balancers mean every throttle twist is met with smooth acceleration and even power, greatly reducing engine vibration and rider fatigue even on the longest rides. With an adjustable seat height ranging from 800 to 820 mm, the 450MT offers unparalleled comfort and control for riders of all sizes. Whether you prefer a lower seat for city cruising or a higher perch for tackling off-road challenges, this feature allows you to customise your ride to fit your needs perfectly, enhancing your overall riding experience. The high-performance J.Juan braking system includes the front brake featuring a 320mm single disc cradled by an opposed four-piston radial caliper for enhanced braking force and feel. In the rear, a 240mm single disc with a single-piston floating caliper ensures balanced stopping power. Bosch® dual-channel ABS provides enhanced stability and increased braking force in critical moments. A simple handlebar-mounted switch lets you engage or
