Description

CMC Motorcycles is proud to offer the 2022 Kawasaki Ninja 650 — a well-balanced middleweight sportbike that combines sharp styling, everyday comfort and approachable performance. Designed to bridge the gap between entry-level and full supersport machines, the Ninja 650 delivers an engaging ride without the extreme demands of track-focused bikes. At the heart of the Ninja 650 is a 649cc liquid-cooled parallel-twin engine, producing around 67–68 horsepower and 64Nm of torque. This engine is tuned for strong mid-range performance and smooth throttle response, making it ideal for both newer riders stepping up and experienced riders wanting a usable, real-world sportbike. Power delivery is predictable and accessible, with enough punch for spirited riding while remaining easy to manage in everyday conditions. The chassis features a lightweight high-tensile steel trellis frame, contributing to a kerb weight of around 193–196kg. This setup provides a confident balance between stability and agility, allowing the bike to feel composed through corners while remaining easy to manoeuvre at lower speeds. Braking performance is handled by dual 300mm front discs and a rear disc, supported by ABS as standard. This provides strong, predictable stopping power suited to both commuting and weekend riding. Ergonomically, the Ninja 650 stands out with its more upright riding position compared to traditional supersport bikes. With a seat height of around 790mm, it offers a comfortable and accessible riding stance, making it suitable for longer journeys as well as daily use. Styling reflects Kawasaki's Ninja family DNA, with aggressive fairings, twin LED headlights and a sharp, modern design that gives it a true sportbike presence. Despite its sporty appearance, the riding position and overall setup make it far more forgiving
