Description

CMC Motorcycles is pleased to offer the 2014 Honda NC750X DCT — a highly practical and versatile crossover motorcycle designed to deliver comfort, fuel efficiency and everyday usability with the added convenience of Honda's advanced Dual Clutch Transmission system. Combining adventure-inspired styling with commuter-friendly practicality, the NC750X has become one of Honda's most respected real-world motorcycles. At the heart of the NC750X DCT is a 745cc liquid-cooled parallel twin engine producing around 54 horsepower and 68Nm of torque. The engine is tuned for strong low and mid-range performance, giving the bike smooth acceleration and excellent fuel economy rather than high-revving outright power. Its relaxed and predictable nature makes it especially well suited to commuting, touring and everyday riding. A major highlight of this model is Honda's Dual Clutch Transmission (DCT), which allows fully automatic gear changes or manual shifting via handlebar-mounted controls. The system delivers smooth, fast gear changes and greatly reduces rider fatigue in traffic and longer journeys while still offering engaging control when desired. Braking performance is reassuring and predictable, with a front disc and rear disc supported by ABS as standard on most models. The braking system complements the bike's balanced and rider-friendly character. One of the NC750X's defining features is its unique storage compartment positioned where a traditional fuel tank would normally sit. This integrated storage area is large enough to hold a full-face helmet or everyday luggage, making the bike exceptionally practical for commuting and touring. Styling combines adventure-bike inspiration with practical crossover design, featuring a tall stance, compact fairing and rugged appearance while remaining slim and
