Description

CMC Motorcycles is pleased to offer the 2022 Honda NT1100 DCT — a sophisticated sports tourer that combines long-distance comfort, advanced technology and everyday practicality with the convenience of Honda's renowned Dual Clutch Transmission system. Built using the proven platform from the Africa Twin, the NT1100 delivers smooth performance, excellent touring capability and refined road manners in a highly versatile package. At the heart of the NT1100 is a 1,084cc liquid-cooled parallel twin engine producing around 100 horsepower and 104Nm of torque. The engine delivers strong mid-range performance with smooth, predictable power delivery, making it exceptionally well suited to touring, motorway cruising and real-world road riding. Its flexible character allows relaxed long-distance riding while still offering responsive acceleration when needed. A major highlight of this model is Honda's Dual Clutch Transmission (DCT), which provides fully automatic gear changes or manual shifting via handlebar controls. The DCT system offers seamless shifts and reduces rider fatigue during commuting and touring, while multiple riding modes adjust shift behaviour depending on riding style and conditions. Ergonomically, the NT1100 is designed specifically for long-distance comfort, featuring a relaxed upright riding position, wide handlebars and a comfortable seat height around 820mm. The adjustable windscreen and excellent weather protection make the bike especially capable for motorway touring and year-round riding. Practicality is another key strength, with the NT1100 supplied with integrated panniers as standard on many models, along with cruise control, heated grips and generous carrying capacity. The comfortable seating position and smooth engine character make it an ideal motorcycle for extended touring journeys.
