### Description

CMC Motorcycles is pleased to offer the 2015 BMW R1200GS Adventure — a rugged, long-distance adventure motorcycle built to handle the toughest journeys with comfort, capability and proven reliability. As the more off-road and touring-focused version of the standard GS, the Adventure model offers increased fuel range, enhanced protection and a more robust overall setup. At the heart of the R1200GS Adventure is a 1,170cc air/liquid-cooled boxer twin engine, producing around 125 horsepower and 125Nm of torque. This engine delivers strong, tractable power with excellent low-end pull and smooth delivery, making it ideal for both technical off-road riding and effortless motorway cruising. The chassis is built around a tubular steel frame paired with BMW's signature Telelever front suspension and Paralever rear system. This unique setup reduces front-end dive under braking and provides exceptional stability, particularly when riding over uneven terrain or carrying heavy loads. The bike's low centre of gravity, thanks to the boxer engine layout, contributes to its balanced and confidence-inspiring handling. Braking performance is strong and controlled, with dual front discs and advanced ABS providing reliable stopping power in a wide range of conditions. The system is complemented by traction control and multiple riding modes, enhancing safety and adaptability. Ergonomically, the R1200GS Adventure is built for long-distance comfort, featuring an upright riding position, wide handlebars and an adjustable seat height typically ranging from around 890 to 910mm. The larger fuel tank, provides an extended range ideal for touring and remote travel. Styling is purposeful and rugged, with large crash bars, a tall windscreen and protective bodywork emphasising its off-road capability. The Adventure model's imposing stance
