Description

CMC Motorcycles is pleased to offer the 2016 Yamaha MT-09 Tracer ABS — a versatile sport-touring motorcycle that combines the thrilling performance of Yamaha's MT-09 platform with enhanced comfort, practicality and long-distance capability. Designed for riders who want both excitement and usability, the Tracer delivers a well-balanced blend of performance and touring refinement. At the heart of the MT-09 Tracer is an 847cc liquid-cooled inline three-cylinder engine, producing around 115 horsepower and 87.5Nm of torque. This lively CP3 engine is known for its strong mid-range punch, responsive throttle and distinctive triple-cylinder character, offering exhilarating acceleration while remaining smooth and manageable for everyday riding. The chassis is based on a lightweight aluminium frame, providing excellent rigidity and agile handling. Compared to the standard MT-09, the Tracer features revised geometry, a longer swingarm and improved stability, making it better suited to high-speed touring and carrying luggage. Suspension consists of adjustable upside-down front forks and a rear monoshock, delivering a balance of comfort and sporty control. The setup is designed to handle a variety of riding conditions, from urban commuting to spirited riding on twisty roads and longer motorway journeys. Braking performance is strong and confidence-inspiring, with dual front discs and ABS as standard. Traction control is also included, adding an extra layer of safety and stability, particularly in variable road conditions. Ergonomically, the Tracer is built for comfort, featuring an upright riding position, wide handlebars and an adjustable seat height (around 845–860mm). An adjustable windscreen and standard handguards improve wind protection, making it well suited to long-distance riding. Touring features include standard pannier
